

**CRANDION****leanient®****a must for those serious about process driven development!**

Introducing Leanient, the best Agile project management tool available! Finally a tool that adapts to your process while giving visibility to the entire development life cycle. Facilitates better communication through superior data handling enabling accurate project tracking!

### **Experience the *Leanient* difference**

**VISIBILITY** - easily see what is done, what resources are available, identify risks, and potential road blocks all while monitoring velocity and team efficiency

**USABILITY** - intuitive and easy to use with "Web 2.0" interface; fully customizable, easy to learn and efficient to use with role-based views

**ADAPTABILITY** - take full advantage of YOUR key process efficiencies and existing tools! Leanient evolves with your process - customize as you go

**EXTENSIBILITY** - cradle to grave view to project management; look beyond internal R&D to fully manage all aspects of the product life cycle; plus import and export data to and from other tools
